

Policy Number: 1985-03
Effective Date: 01/01/1985
Revised Date: 02/05/2020
Applicability: Faculty, Staff, Students, and Departments

Purpose

To be a good environmental steward and to comply with applicable state and local laws, Lehigh University fully supports an ongoing single-stream recycling program.

Policy

All faculty, staff, and students are expected to cooperate with Lehigh University's mandated single-stream recycling program.

Appropriately marked single-stream recycling bins are provided in both indoor and outdoor locations.

Procedures in effect at this time:

Glass containers, plastic water and soda bottles (no caps), metal cans, and paper can be placed together in appropriately marked indoor and outdoor single-stream recycling bins. The items **MUST BE** clean and empty.

Cardboard should be placed *next to* single-stream recycling bins.

Plastic bags *should not* be placed in the single-stream recycling bins. There are separate yellow plastic film recycling bins throughout campus for plastic bags.

When in doubt, throw it out!

Trash must be placed in appropriate indoor and outdoor bins.
