LU development since the 2012 campus plan

## PURPOSE OF THE PLAN

- Align Lehigh’s physical campus to **meet the challenges of the university’s new strategic plan**, *Inspiring the Future Makers*.
- Consider the University’s three main activity areas – the Asa Packer, Mountaintop, and Goodman campuses – as **one complementary whole**, well-connected in its parts, set within a series of ecologically sensitive landscapes, and intrinsically linked to its neighboring communities.
- Develop a set of **specific actions and projects to be undertaken within the next ten years within a broader framework** for the long-term (30 years) development of Lehigh’s campus, with multiple pathways to implementations.
- Establish **project priorities, linked to order-of-magnitude costs** and aligned with university resources.

Understanding and engaging the campus

## **As we plan for the future of Lehigh's campus....**

...what strengths and weaknesses do you see in the physical campus?

...what questions and issues should we keep top of mind?
