

ASA PACKER CAMPUS (APC) CENTRAL HEATING AND REFRIGERATION PLANT (CH&R)

**All buildings listed below receive steam from the central plant for heating, summer reheat, domestic hot water, and building specific equipment - please review for your specific building**

**Buildings highlighted in Blue receive chilled water for cooling from Central Plant**

**Notes:**

1) Summer reheat is the use of steam to temper cold air produced by air conditioning systems prior to circulation in the building.
