

MOUNTAINTOP CAMPUS (MTC) CENTRAL HEATING AND REFRIGERATION PLANT (CH&R)

All buildings listed below receive steam from central plant for heating, summer reheat, domestic hot water, and building specific equipment - please review for your specific building

Buildings highlighted in Blue receive chilled water for cooling from Central Plant

Notes:

- 1) Summer reheat is the use of steam to temper cold air produced by air conditioning systems prior to circulation in the building.
- 3) Gatehouse (Bldg 119), substation, and former gas house buildings do not receive steam or chilled water.

Building Number	Building Name	Steam Function			Notes
		Heating	Summer Reheat	Domestic Hot Water	
111	Iacocca Hall	Yes	Yes	Yes
