

Policy Number: 7  
Effective Date: 10/1991  
Revised Date: 5/1/2019  
Applicability: Radioactive Material and Machines Capable of  
Producing Ionizing Radiation Policy

#### Purpose

To ensure all activities related to sources of ionizing radiation are conducted in compliance with the Nuclear Regulatory Commission and the Department of Environmental Protection.

#### Policy

No person shall purchase, receive, possess, use, transfer or dispose of any source of ionizing radiation (radioactive material or equipment capable of producing ionizing radiation as defined by regulation) except with the approval of the Radiation Safety Officer and in accordance with the procedures established by the Radiation Safety Committee.
